

ANSERS, Louvain-La-Neuve, Belgium, <http://ansers.eu/>, has chosen EUKEM to broaden the European geographical reach of its **analytical service offerings** in polymer additives.

BANDOL CONFERENCES, Bandol, France, <http://bandol-conferences.com/>, announces the **19th BANDOL CONFERENCES** that will take place on September 26-27-28, 2017 in Bandol, France. The scientific and technical communications will focus on the questions of natural and accelerated weathering testing technologies as well as the light stabilization of polymer formulations.

IonPhase Oy, Tampere, Finland <http://www.ionphase.fi/>, after successful market evaluation, IonPhase launches **IPE trSTAT**, its specific static-dissipative polymeric additive for PMMA applications. With IPE trSTAT, a high level of transparency can be achieved.

OKA-Tec GmbH, Bönen, Germany <http://www.oka-tec.com/>: recently developed **OKABEST™ CLX 70 and OKABEST™ CLX 80** advanced solutions to prevent discoloration and also the water pick-up of PA6 and PA66 compounds. They act as very effective processing stabilisers with excellent color retention after processing. They match the performance of copper complexes, provide very good electrical properties and do not contain any heavy metals or halogenides.

SABO, Leivate, Bergamo, Italy, <http://www.sabo.com/> proposes the **EXP UV 0216**, a new light stabilization system for

agricultural films. It outperforms state-of-the-art “very high pesticide treatment” additives systems. The tests were conducted under laboratory conditions simulating severe fumigation, and field tests are still underway.

SEVAR SARL, Bandol, France www.stationdebandol.com/, will exhibit the **BANDOL WHEEL® H 400** and communicate **Advances in Ultra Accelerated Weathering®** at the SPE Additives & Color Europe Division in Mestre (Venice), Italy, on 22-24 March 2017. The **BANDOL WHEEL®** will also be visible on ERICHSEN’s booth (Hall 5 - 5-333) at the European Coating Show in Nürnberg on 4-5-6 April.

WEFORYOU GmbH, Graz, Austria, <http://www.weforyou.pro>, becomes now the second biggest global producer of **PLA** with an annual capacity of 50,000 MT Polylactic Acid and PLA Compounds. EUKEM was selected to support WEFORYOU’s Business Development efforts in Europe.

IQCHEM Inc, Witterswil, Switzerland, will exhibit at the European Coating Show in Nürnberg on 4-5-6 April. Hall 7 / booth 7-202. IQCHEM have recently added the **PO 67** to its portfolio. IQCHEM’s **IQC Coat Orange 67** brings a brilliant yellowish shade of orange with a very good light and weather fastness. It is used in both decorative paints and emulsion paints as well as industrial paints. It delivers a high hiding power and can advantageously substitute molybdate orange pigments. It is also more opaque than **PO 73, DPP orange**.
